

Exit MFP

MFP

Prior to exiting MFP, an annual assessment will be completed to ensure the participant is still eligible for waiver or 1915(i) services. If the participant is still eligible, then the participant simply becomes a waiver consumer or 1915(i) consumer. The change in status should appear seamless to the MFP participant.

Demonstration services will end on day 366..... This may require planning to meet the participant's needs. Guidance in this area will continue as demonstration services are defined and added.

Payment for services will revert back to the existing programs and the MFP participants will become part of the case management team budgets.

The MFP program will mail a formal letter to the MFP participant notifying him/her of the date of MFP services ending. The MFP program will mail a formal letter to the Regional Transition Coordinator indicating the end date of a person's participation in MFP.

The third and final Quality of Life Survey will be completed at approximately 24 months after the participant moves to a community residential setting. (It is yet to be determined who will complete the final QOL survey).
